

Document 11: Training & Placement Cell Handbook

Institution: Hyderabad Institute of Technology (HIT)

Document Version: 2026.1

Effective Academic Year: 2026-2027

1. The Placement Philosophy and T&P Cell Hierarchy

The Training and Placement (T&P) Cell at Hyderabad Institute of Technology (HIT) operates as the official centralized liaison between the corporate sector and the student body. The primary objective of the T&P Cell is to facilitate a seamless transition from academic learning to professional employment. However, it is explicitly stated that campus placement is a facility provided by the university, not a fundamental right of the student. The university guarantees placement assistance, not placement assurance.

The T&P Cell is governed by a strict hierarchical structure to ensure corporate standards of communication. The apex authority is the Chief Placement Officer (CPO), who holds the final veto power over all recruitment drives. Beneath the CPO are the Departmental Placement Coordinators (Faculty Members), and finally, the Student Placement Committee (SPC).

Standard students are legally prohibited from contacting HR representatives of visiting companies directly via LinkedIn, email, or personal phone numbers to ask about interview schedules or offer letters. Any student found bypassing the T&P Cell to directly solicit favors or information from a visiting corporate recruiter will face immediate expulsion from the entire campus placement process for the rest of the academic year.

2. Strict Academic Eligibility Criteria for Campus Placements

To maintain the prestigious reputation of the institution among corporate recruiters, the T&P Cell strictly filters students before allowing them to register for the campus placement portal. Meeting the university's degree passing criteria is not sufficient to secure placement eligibility; the corporate eligibility thresholds are significantly higher.

At the beginning of the seventh semester (the official start of the placement season), a student must meet the following baseline requirements to be granted access to the placement portal:

- **The CGPA Cutoff:** The student must possess a minimum Cumulative Grade Point Average (CGPA) of 6.5, calculated from the first semester up to the end of the sixth semester.
- **The Backlog Rule:** The student must have exactly zero active academic backlogs. If a student has even one uncleared F-grade at the start of the seventh semester, they are classified as "Not Eligible." If the student clears the backlog during the supplementary exams in December, they will be granted access to Phase 2 of the placement drive starting in January.
- **The Tenth and Twelfth Grade Floor:** Most Tier-1 multinational corporations enforce strict high-school academic floors. Therefore, HIT requires that students must have secured a minimum of 60% aggregate marks in both their 10th Standard (SSC/CBSE) and 12th Standard (Intermediate/HSC) board examinations.

If a student's CGPA drops below 6.5 during the seventh semester, their placement portal access is immediately frozen. Any pending interview schedules for that student will be instantly canceled by the T&P Cell without prior notice.

3. The "One Student, One Job" and "Dream Offer" Upgrade Policy

To ensure that employment opportunities are distributed equitably among the massive student cohort, HIT enforces a strict "One Student, One Job" foundational rule, modified only by the specialized "Dream Offer" upgrade system.

When a student secures a final job offer from a visiting company, they are instantly deregistered from the placement portal. They are no longer permitted to sit for any standard companies. However, to reward exceptional talent, the university divides visiting companies into three distinct financial tiers based on their Cost to Company (CTC) packages:

- **Tier 1 (Standard Core/IT Offers):** Companies offering a CTC between ₹3,50,000 (3.5 LPA) and ₹6,00,000 (6.0 LPA).
- **Tier 2 (Dream Offers):** Companies offering a CTC strictly between ₹6,01,000 (6.01 LPA) and ₹12,00,000 (12.0 LPA).
- **Tier 3 (Super Dream Offers):** Product-based multinational companies or specialized startups offering a CTC greater than ₹12,01,000 (12.01 LPA).

The Upgrade Mechanism: If a student currently holds a Tier 1 Standard Offer (e.g., 4.5 LPA), they are permitted to re-enter the placement process *only* for Tier 2 (Dream) or Tier 3 (Super Dream) companies. They cannot apply for another Tier 1 company, even if it pays slightly more (e.g., a student with a 4.5 LPA offer cannot sit for a 5.5 LPA company).

If the student successfully secures a Tier 2 Dream Offer (e.g., 8.0 LPA), their original Tier 1 offer is automatically surrendered by the T&P Cell and passed to the next waitlisted student. Once a student holds a Tier 2 Dream Offer, they can only upgrade to a Tier 3 Super Dream company. Once a student secures a Tier 3 Super Dream offer, their placement journey is permanently concluded, and their portal is permanently locked.

4. Resume Formatting and Data Integrity Mandates

Corporate recruiters review thousands of resumes; therefore, consistency and honesty are strictly enforced by the T&P Cell. All eligible students must build their resumes exclusively using the "HIT Standardized Corporate Template" available on the student portal. Utilizing colorful, highly graphic, or non-standard external resume formats (like Canva templates) is prohibited for campus drives unless explicitly requested by a design-focused company.

The data printed on the resume is considered a legally binding academic document.

- **CGPA Rounding:** Students must report their exact CGPA up to two decimal places (e.g., 7.48). Mathematical rounding (e.g., turning 7.48 into 7.5) is classified as data falsification.
- **Project Verification:** Any technical project, internship, or certification listed on the resume must be backed by physical proof (a certificate of completion or a live GitHub repository link).

If a visiting HR representative or an internal T&P verification officer discovers that a student has fabricated an internship, inflated their CGPA, or lied about a technical skill on their resume, the student faces immediate and severe consequences. The student will be permanently expelled from the placement process, their active offers will be immediately revoked by the university, and a formal letter of academic fraud will be added to their permanent record.

5. Pre-Placement Talk (PPT) and Interview Code of Conduct

The recruitment process for any visiting company begins with a Pre-Placement Talk (PPT), where company executives outline the job profile, service bonds, and exact CTC breakdown.

If a student registers for a company on the T&P portal, attendance at that company's PPT is strictly mandatory. Biometric attendance is taken at the auditorium doors before the PPT begins. If a registered student fails to attend the PPT, they are automatically disqualified from writing the subsequent online aptitude test or sitting for the interview, regardless of their technical brilliance.

The Interview Dress Code: The dress code for PPTs, online tests, and physical interviews is uncompromisingly rigid.

- Male students must wear a dark formal suit (navy blue, charcoal grey, or black), a light-colored solid shirt, a conservative tie, cleanly shaved faces (or neatly trimmed formal beards), and polished black leather shoes.
- Female students must wear a formal business suit (trousers or knee-length skirt with a blazer) or a conservative, neatly pinned formal saree/salwar kameez in muted tones.
- Students arriving at the interview waiting halls in casual attire, unpolished shoes, or smelling of cigarette smoke will be immediately turned away by the Student Placement Coordinators and marked as "Absent" for the drive.

6. Blacklisting, Debarment, and Financial Penalties

The T&P Cell safeguards the university's corporate relationships aggressively. Unprofessional behavior by a single student can cause a multinational company to blacklist the entire university for years. To prevent this, HIT enforces a ruthless internal blacklisting protocol.

A student will be instantly blacklisted, permanently removed from the placement portal, and fined a massive penalty of ₹10,000 if they commit any of the following offenses:

1. **Skipping an Interview:** Registering for a company, clearing the aptitude test, and then intentionally failing to show up for the technical or HR interview rounds without a severe, documented medical emergency.
2. **Rejecting an Offer:** If a student secures a final offer from a company through the campus drive, they are legally bound to accept it. Rejecting a campus offer because the student "changed their mind" or "wants to prepare for government exams" is a Tier-1 violation. The offer must be accepted, and the student must join the company after graduation.
3. **Deliberate Underperformance:** If a visiting HR panel officially complains to the T&P Cell that a student gave deliberately absurd answers, used foul language, or displayed extreme arrogance to intentionally fail an interview (a tactic sometimes used to save themselves for a different company), the student is permanently expelled from all future drives.

7. Pre-Placement Offers (PPO) via Summer Internships

Many students secure two-month or six-month summer internships at multinational companies at the end of their third year. If a student performs exceptionally well during this internship, the company may bypass the standard interview process and extend a Pre-Placement Offer (PPO) directly to the student before the seventh semester even begins.

The T&P Cell integrates PPOs directly into the standard tier system.

- If a student receives a PPO from their internship company, they must immediately inform the T&P Cell within 48 hours and submit a copy of the official offer letter.
- If the PPO falls under Tier 1 (Standard, under 6 LPA), the student must accept it, but they retain the right to sit for Tier 2 or Tier 3 campus drives as per the upgrade policy.
- If the PPO falls under Tier 2 (Dream) or Tier 3 (Super Dream), the student is considered fully placed. They must accept the PPO and are completely barred from sitting for any campus recruitment drives. Hiding a PPO from the T&P Cell to illegally sit for campus drives is grounds for degree suspension.

8. Off-Campus Placements and Joining Protocols

HIT encourages students to hunt for opportunities off-campus via platforms like LinkedIn or direct corporate careers pages. However, the university maintains strict tracking of all student employment.

If a student secures an off-campus job offer, they must submit the verified offer letter to the T&P Cell. Once verified, the T&P Cell will officially mark the student as "Placed Off-Campus." To prevent students from hoarding multiple jobs, an off-campus placed student will immediately lose access to the internal campus placement portal, regardless of the CTC of their off-campus offer.

Once all academic examinations are concluded in May, successfully placed students will undergo a mandatory "Corporate Exit Orientation." During this session, the T&P Cell releases the final official joining letters to the students. A student will not be allowed to join their recruited company if they have any outstanding library fines, unpaid hostel dues, or uncleared academic backlogs preventing the issuance of their Provisional Degree Certificate.
